

## BSBPMG510A Manage Projects

### Unit Description

This unit describes the performance outcomes, skills and knowledge required to manage a straightforward project or a section of a larger project. This unit addresses the management of projects including the development of a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learnt for application to future projects.

The workshop addresses the management of projects including the development of a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learnt for application to future projects.

### What are the benefits of attending this course?

The following benefits for individuals, teams and organisations are achieved by attending this workshop:

- Having a clear, defined understanding of the parameters of a project
- Understanding how the outcomes of the project relate to organisational goals
- Possess the ability to scope and develop a project plan
- Effectively use Gantt Charts and other management tools
- Conduct a risk management assessment and develop contingencies to manage these risks
- Develop and monitor a project budget
- Possess the ability to implement and review the outcomes of a project

### How is it delivered?

The course is delivered in a one day format which introduces participants to the features and steps in development of project management through working through a work-based scenario. Hands on exercises help participants to develop strategies to develop, implement and monitor a project.
